

EXPORT DIRECTORY

SPECIAL REGION OF YOGYAKARTA

PREFACE

Assalamualaikum Warahmatullahi Wabarakatuh,
May peace be upon us all.

As an effort to increase regional economic activity through trade and investment, the Government of Yogyakarta Special Region actively collaborates with various stakeholders, particularly those abroad, by disseminating information about the business world in Yogyakarta.

Along with this, the Government of Yogyakarta Special Region through Yogyakarta's International Affairs and Investment Office (DPMTSP) has compiled an Export Directory booklet, which contains data information on business actors who have carried out exports along with their featured products.

The various products offered in this booklet include medical tools or equipment, agricultural tools and machinery, plantation products, furniture, canned traditional food, batik handicrafts, decorations, leather craft products, cigars, and many others.

I sincerely hope that this booklet can become a source of information for business people from abroad so that they can find the best business partners and products from Yogyakarta Special Region, based on their own interests and needs.

Wassalamualaikum Warahmatullahi Wabarakatuh.
May peace be upon us all.

Yogyakarta, November 2023

BATIK

Shiroshima, a fashion brand founded in 2019, processes batik into ready-to-wear clothing by combining traditional and contemporary elements. In contrast to processed batik fabrics in general, which are identical to traditional motifs that look "heavy" and formal, Shiroshima chose to develop contemporary "simple" batik motifs that look more modern but still do not leave a traditional impression with the Batik process.

KIAS LEATHER

Kias Leather is a family company established in the 1980s in Yogyakarta growing as the first exporter of leather goods in Yogyakarta in the 90s to many countries Under CV. Fel & Co International. Today, Kias Leather remains one of the traditional leather manufacturers in Yogyakarta. It has some expert in-house leather craftsmen who have more than 25 years of experience. Its bags are mostly using vegetable-tanned leather from the Javanese cowhide that are tanned with natural tree bark tannins that maintain the original features of the leather and makes the identity of the bags.
